***Response to Arguments***

1. Applicant's arguments, see page 6, filed 2/23/10, with respect to the rejection of claims under 35 U.S.C. 112 first paragraph have been fully considered and are persuasive. The rejection of claim 1 has been withdrawn.

***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: The subject matter of the independent claim could not be found and was not suggested by the prior art of record. The subject matter not found is a catheter having a flexible tube defining an inner diameter, an open distal end and a plurality of openings formed therethrough, a dome-shaped conductive end cap closing the open distal tip of the tube, the cap having a maximum outer diameter not greater than the inner diameter of the tube, and a flexible conductive member attached at one end to the conductive end cap and running the length of the tube, in combination with the features of the invention substantially as claimed. It is noted that the limitation "closing said open distal tip of the tube" in claim 1 is interpreted to mean that the end cap completely closes the distal tip to substantially prevent fluid flow therethrough. The prior art of record does not teach or suggest the maximum outer diameter of the end cap being not greater than the inner diameter of the tube in combination with the invention substantially as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
